

# Next-Gen Protection

Eaton's new 5E Gen2 UPS delivers the protection you need for critical devices in home office or workshop environments.

Power rated for 700 VA up to 2200VA, the 5E Gen2 can protect multiple devices and applications in silence thanks to its fanless operation.

Its small footprint makes it easy to fit into your setup and it will auto restart after a power event to deliver on-going, assured power protection.

## Ideal protection for:

- Computers, workstations and peripherals
- Internet routers & NASs
- TVs, gaming consoles and other power-hungry devices
- Home security
- Point of sale & ticketing machines
