

You get out what you put in

No matter how sophisticated the technology around them, battery performance is determined by the quality of the manufacturing process and the care taken with maintenance. Battery selection is one of the most vital decisions in protecting your most critical processes, assets and infrastructure – so choose wisely.

CSB Batteries are built in a world-class facility, using the very best ingredients and chemistry to deliver unmatched reliability and performance.

99.9% pure lead: No mixed metals means longer service life and consistency across individual blocks in a battery string

State of the art facilities: Factory shipped direct to NZ and fresh on delivery to deliver maximum service life

Design excellence: Specialists in battery design and renowned for producing the highest power density in the smallest footprint

Application specific: Design expertise harnessed to deliver battery models specific to UPS, security, telco and high temperature applications

Visible validation: Transparent testing process and published runtime charts providing confidence in meeting your runtime requirements

Feature models

HR, HRL, XHRL

High rate discharge battery
ideal for UPS applications
5-10 year design life

TPL

High capacity, front service
access and easy rack installation
to suit telecommunication
applications
12 year design life

XTV

Superior performance at high
temperatures with extended
design life for outdoor cabinet
applications
12 year design life

GP

Extended discharge for
performance over a longer
time period and cost effective
for alarm systems emergency
lighting and other general-
purpose applications
5 year design life

Talk to the experts about your applications and ensure you're using the perfect CSB Battery solution
